

BURDIS

# EZ 600 Automatic Single-Clip Machine

## QUALITY & HYGIENE

Made of stainless steel and industrial plastic, easy to clean.

## MAINTENANCE

Low maintenance and wear thanks to a limited number of parts.

- To close bags and nets
- Firm, safe packaging
- High Quality stainless steel and industrial plastic
- Horizontal version also available

## WHY CHOOSE THE EZ 600 ?

The clipping machine guarantees reliable closing of bags and nets. It is especially used for the effective packaging of poultry. Many other products, including liquids, can be tamper-proof packed in bags with the original closing clip. Different machine designs are available for various product and bag sizes.

## Advantages

- *Firm, tight and hygienic packaging thanks to the clip closure*
- *Automatically triggered by inserting the tail into the slot*
- *Integrated pneumatic knife*
- *Table top or in-built version, left-hand or right-hand, with backward-inclined or upright machine on base plate*
- *Easy to handle, low air consumption*
- *Certified safe for use with food by SGS Institut Fresenius*
- *Clips and loops certified according to ISO 22000*

BURDIS

# EZ 600 Automatic Single-Clip Machine

## OPTIONAL EQUIPMENT

- Horizontal version (with trolley and 35-48mm diameter rod mounting bracket sold separately)
- S-clips on roll for efficient production
- Pressure reducer with filter
- Machine stands (table top version)
- Tamper proof labelling system, batch traceability

## COMBINABILITY

- Can be linked to the MPL poultry loader (bagger)
- Suitable for vacuum packaging and shrink bags; can be associated with a VAC vacuum system

## OPERATION

The clipping process starts automatically by inserting the tail into the slot of the clip guide. The pneumatic knife then cuts the tail from the bag.

Pneumatic operation, requires a compressor.

Width	200 mm
Depth	360 mm
Height	900 mm
Weight	10 kg
Compressed air	5 - 7 bar / 0,5 - 0,7 Mpa
Air consumption 5 bar	2,4 NL/cycle
Air consumption 7 bar	2,7 NL/cycle
